WORKWEAR

WORKWEAR

proforce® has developed a range of garments that provide flexibility in an ever changing and demanding environment. The proforce® range incorporates traditional cottons and polycottons as well as combining technical fabrics offering the highest levels of functionality and quality.

All garments are CE marked and fully meet the EEC directive for Personal Protective Equipment (PPE) No.89/686/EEC and provide protection to simple classification.

Proforce® workwear harness additional protection being engineered to meet BS EN 340: 1993 'protective clothing – general requirements', this ensures all garments meet the following minimum requirements:

- Ergonomics
- Care & Maintenance
- Sizing & Fit
- Marking

Workwear in the weatherwear section are further developed to withstand the harshest weather conditions keeping the wearer warm, dry and comfortable when encountering long periods of exposure to wind and rain.

Where stipulated some proforce garments provide protection to ENV343: 1998 'protective clothing – protection against foul weather'. This ensures that these garments have been engineered to offer the following levels and types of protection:

- Thermal Protection
- Water Vapour Resistance
- Water Penetration Resistance
