**HIGH VISIBILITY PROTECTION**

## HIGH VISIBILITY

proforce® high visibility protective clothing has been designed and configured to signal excellence in the protection of your personnel where enhanced visibility is imperative to prevent accidents and maintain a safe working environment.

High visibility garments meet BS EN471: 1994, and in some cases also meet the Rail Track directorate standard GO/RT3279 Edition 5. In addition to the minimum requirements for reflectivity and conspicuity many other garments have been engineered to ENV343

'Protective Clothing - Protection Against Foul Weather' which provides protection for:

- **Thermal Protection**
- **Water Vapour Resistance**
- **Water Penetration Resistance**
- Key Features of the proforce® range are:
- **EN accredited batch test traceability**
- **Full ENV approved waterproof seams and fabrics**
- **Class 1,2 and 3 levels of EN471 protection**

## RAINWEAR

proforce® rainwear has been designed to withstand the harshest of weather conditions, keeping the workforce warm, dry & comfortable.

All four rain suits provide protection to ENV343  
 □ Protective Clothing - Protection Against Foul Weather□.

All garments offer protection to the intermediate level of protection and fully meet EN340, are CE marked and meet the EEC directive for PPE.
